Receiving supervisor and institute:

Title of the Mission

Summary

Please provide a summary (250 words maximum) of the proposed Mission

Key objectives

Briefly describe the key objectives of the Mission

Proposed experiments

Give a description of the proposed experiments to be performed during the STSM. The description should be concise, but detailed enough to allow the reviewers to form a clear idea of the planned research activities. (around 1000 words maximum)

Relevance of the proposed STSM in the scope of the COST action

Describe how the COST Action will benefit from the proposed STSM.

Synopsis of current work and experience

Describe your current work and your experience relevant to the proposed research activity (500 words maximum)

References

All references must state the title of the paper, the full author list (for joint first authorships: in the same order as they appear in the original paper) and full journal reference details.
